

Transfer Movies, Videotapes, Slides, Negatives & Prints to DVD Disc or Flash Drive

You can now enjoy your family's old home movies, videotapes, slides, negatives and prints that are stored in your attic or basement! Most people no longer own a VCR, movie or slide projector. If you do, the bulb is probably burned out or the projector is broken. It doesn't have to be that way! Home movies, videos, slides, etc. on DVD disc or flash drives are wonderful gifts for loved ones; preserving your family history for your children and grandchildren. *Why not get started TODAY... before it's too late?*

SpectraLight Photography & Design Offers:

* Video files on a flash drive will play on computers. You can connect a computer to a TV with an HDMI cable via the TV's HDMI jack. On some TVs, you may be able to plug the flash drive directly into the TV via its USB port to watch your videos. Unfortunately, this doesn't work on all TVs.

Video Slideshow from Digital Files, Paper Photos or 35mm Slides

Enjoy your digital files, paper photos* or 35mm slides without the hassle of projectors and screens. Watch them on any device.

Prices include dissolves between photos and free background music. *Photos must be from 2x3 up to 8x10 inches in size.

Slides must be removed from trays and numbered in the order they are to appear in the show. Add \$15 per tray if not.

Approximately 1,000 images will fit on a 2-hour DVD disc or flash drive. The resolution of the files in the slideshow are best for viewing on a TV, smartphone, tablet or computer. They are not high enough resolution for making prints.
